## CARPET AND UPHOLSTERY CLEANING

**In-House Certified Technicians  
Exclusive Butler Cleaning System  
Truck Mounted Steam Cleaning**

**HEAVY DUTY VACUUMING**-Use of high speed commercial vacuum for maximum removal of dry soil.

**PRE-TREATMENT**-Spray application of specifically formulated cleaning agents suspend deeply embedded soil.

**SPOT REMOVAL**-Special cleaning agents will be used in attempts to remove persistent spots.

**SANITIZER**-We use the latest, new generation bacteria-killing agents to kill germs which actually neutralizes carpet odor.

**GROOMING**-A professional grooming is used to aid in restoring the fluff and set of the carpet pile. This assures faster drying and gives carpet a finished, detailed look.

**CARPET PROTECTOR**-The use of only the highest quality carpet protector which repels soil and staining materials, and prolongs the life of your carpet.

**ULTRA-EXTRACTION SYSTEM**-Our exclusive system will thoroughly rinse the carpet with clear, hot, softened water, rather than the popular meter-feeding system. This process will not only remove soil but also rinses out all residue, thus limiting re-soiling, and extending the carpet life.

### SPECIALTY RUG CLEANING

Drop off any area rug during normal business hours and we'll professionally clean it for you! With certified technicians on staff, your sure to get the quality you deserve. We also offer pick up and delivery service!

## DUCT CLEANING

**Duct Cleaning Could Be The  
Healthiest Home Improvement  
Investment You Will Ever Make.**

**FACT:** Dust, dirt, pollen, animal dander and other airborne contaminants are pulled into your air duct system every time the furnace or air conditioner runs. These contaminants build up inside the ductwork over time and can help make your duct system an ideal breeding ground for mold spores, bacteria, fungus, mildew and other microbes. When your air-system is activated, this debris is then re-circulated into your breathing air, causing stale, musty odors, increased allergies, asthma and other respiratory ailments.

**PATENTED HEPA-AIRE® SYSTEM**-The HEPA-AIRE® method assures you that your ducts are being cleaned with the most advanced removal technology available. The key components of this system are the HEPA-AIRE® power vacuum and the AIR-SWEEP® compressor. This system enables our technicians to reach and thoroughly clean your entire duct system with minimal noise and disruption.

- ◆ The power vacuum is connected to the duct system near the furnace.
- ◆ Long lengths of hose with special 360° high velocity nozzles are connected to the compressor and 'snaked' through the entire duct system, dislodging debris that has accumulated on inner duct surfaces.
- ◆ The HEPA-AIRE unit creates a powerful vacuum, pulling dislodged contaminants into its filtration system. This filtration system is so efficient that it captures contaminants 1/300th the diameter of a human hair and returns filtered "hospital grade" air to your home.
